

SENATE, No. 344

STATE OF NEW JERSEY 219th LEGISLATURE

PRE-FILED FOR INTRODUCTION IN THE 2020 SESSION

Sponsored by:

Senator BOB SMITH

District 17 (Middlesex and Somerset)

Senator CHRISTOPHER "KIP" BATEMAN

District 16 (Hunterdon, Mercer, Middlesex and Somerset)

Senator LINDA R. GREENSTEIN

District 14 (Mercer and Middlesex)

Co-Sponsored by:

Senator Codey

SYNOPSIS

Requires, by energy year 2050, all electric power sold in NJ by each electric power supplier and basic generation service provider to be from zero-carbon sources.

CURRENT VERSION OF TEXT

Introduced Pending Technical Review by Legislative Counsel.

1 AN ACT concerning carbon emissions from electric power
2 generation and amending P.L.1999, c.23.

3

4 **BE IT ENACTED** by the Senate and General Assembly of the State
5 of New Jersey:

6

7 1. Section 38 of P.L.1999, c.23 (C.48:3-87) is amended to read
8 as follows:

9 38. a. The board shall require an electric power supplier or
10 basic generation service provider to disclose on a customer's bill or
11 on customer contracts or marketing materials, a uniform, common
12 set of information about the environmental characteristics of the
13 energy purchased by the customer, including, but not limited to:

14 (1) Its fuel mix, including categories for oil, gas, nuclear, coal,
15 solar, hydroelectric, wind and biomass, or a regional average
16 determined by the board;

17 (2) Its emissions, in pounds per megawatt hour, of sulfur
18 dioxide, carbon dioxide, oxides of nitrogen, and any other pollutant
19 that the board may determine to pose an environmental or health
20 hazard, or an emissions default to be determined by the board; and

21 (3) Any discrete emission reduction retired pursuant to rules and
22 regulations adopted pursuant to P.L.1995, c.188.

23 b. Notwithstanding any provisions of the "Administrative
24 Procedure Act," P.L.1968, c.410 (C.52:14B-1 et seq.) to the
25 contrary, the board shall initiate a proceeding and shall adopt, in
26 consultation with the Department of Environmental Protection, after
27 notice and opportunity for public comment and public hearing,
28 interim standards to implement this disclosure requirement,
29 including, but not limited to:

30 (1) A methodology for disclosure of emissions based on output
31 pounds per megawatt hour;

32 (2) Benchmarks for all suppliers and basic generation service
33 providers to use in disclosing emissions that will enable consumers
34 to perform a meaningful comparison with a supplier's or basic
35 generation service provider's emission levels; and

36 (3) A uniform emissions disclosure format that is graphic in
37 nature and easily understandable by consumers. The board shall
38 periodically review the disclosure requirements to determine if
39 revisions to the environmental disclosure system as implemented
40 are necessary.

41 Such standards shall be effective as regulations immediately
42 upon filing with the Office of Administrative Law and shall be
43 effective for a period not to exceed 18 months, and may, thereafter,
44 be amended, adopted or readopted by the board in accordance with
45 the provisions of the "Administrative Procedure Act."

EXPLANATION – Matter enclosed in bold-faced brackets **[thus]** in the above bill is
not enacted and is intended to be omitted in the law.

Matter underlined thus is new matter.

1 c. (1) The board may adopt, in consultation with the
2 Department of Environmental Protection, after notice and
3 opportunity for public comment, an emissions portfolio standard
4 applicable to all electric power suppliers and basic generation
5 service providers, upon a finding that:

6 (a) The standard is necessary as part of a plan to enable the
7 State to meet federal Clean Air Act or State ambient air quality
8 standards; and

9 (b) Actions at the regional or federal level cannot reasonably be
10 expected to achieve the compliance with the federal standards.

11 (2) By July 1, 2009, the board shall adopt, pursuant to the
12 “Administrative Procedure Act,” P.L.1968, c.410 (C.52:14B-
13 1 et seq.), a greenhouse gas emissions portfolio standard to mitigate
14 leakage or another regulatory mechanism to mitigate leakage
15 applicable to all electric power suppliers and basic generation
16 service providers that provide electricity to customers within the
17 State. The greenhouse gas emissions portfolio standard or any other
18 regulatory mechanism to mitigate leakage shall:

19 (a) Allow a transition period, either before or after the effective
20 date of the regulation to mitigate leakage, for a basic generation
21 service provider or electric power supplier to either meet the
22 emissions portfolio standard or other regulatory mechanism to
23 mitigate leakage, or to transfer any customer to a basic generation
24 service provider or electric power supplier that meets the emissions
25 portfolio standard or other regulatory mechanism to mitigate
26 leakage. If the transition period allowed pursuant to this
27 subparagraph occurs after the implementation of an emissions
28 portfolio standard or other regulatory mechanism to mitigate
29 leakage, the transition period shall be no longer than three years;
30 and

31 (b) Exempt the provision of basic generation service pursuant to
32 a basic generation service purchase and sale agreement effective
33 prior to the date of the regulation.

34 Unless the Attorney General or the Attorney General's designee
35 determines that a greenhouse gas emissions portfolio standard
36 would unconstitutionally burden interstate commerce or would be
37 preempted by federal law, the adoption by the board of an electric
38 energy efficiency portfolio standard pursuant to subsection g. of this
39 section, a gas energy efficiency portfolio standard pursuant to
40 subsection h. of this section, or any other enhanced energy
41 efficiency policies to mitigate leakage shall not be considered
42 sufficient to fulfill the requirement of this subsection for the
43 adoption of a greenhouse gas emissions portfolio standard or any
44 other regulatory mechanism to mitigate leakage.

45 d. Notwithstanding any provisions of the “Administrative
46 Procedure Act,” P.L.1968, c.410 (C.52:14B-1 et seq.) to the

1 contrary, the board shall initiate a proceeding and shall adopt, after
2 notice, provision of the opportunity for comment, and public
3 hearing, renewable energy portfolio standards that shall require:

4 (1) that two and one-half percent of the kilowatt hours sold in
5 this State by each electric power supplier and each basic generation
6 service provider be from Class II renewable energy sources;

7 (2) beginning on January 1, 2020, that 21 percent of the
8 kilowatt hours sold in this State by each electric power supplier and
9 each basic generation service provider be from Class I renewable
10 energy sources. The board shall increase the required percentage
11 for Class I renewable energy sources so that by January 1, 2025, 35
12 percent of the kilowatt hours sold in this State by each electric
13 power supplier and each basic generation service provider shall be
14 from Class I renewable energy sources, and by January 1, 2030, 50
15 percent of the kilowatt hours sold in this State by each electric
16 power supplier and each basic generation service provider shall be
17 from Class I renewable energy sources. Notwithstanding the
18 requirements of this subsection, the board shall ensure that the cost
19 to customers of the Class I renewable energy requirement imposed
20 pursuant to this subsection shall not exceed nine percent of the total
21 paid for electricity by all customers in the State for energy year
22 2019, energy year 2020, and energy year 2021, respectively, and
23 shall not exceed seven percent of the total paid for electricity by all
24 customers in the State in any energy year thereafter. In calculating
25 the cost to customers of the Class I renewable energy requirement
26 imposed pursuant to this subsection, the board shall not include the
27 costs of the offshore wind energy certificate program established
28 pursuant to paragraph (4) of this subsection. The board shall take
29 any steps necessary to prevent the exceedance of the cap on the cost
30 to customers including, but not limited to, adjusting the Class I
31 renewable energy requirement.

32 An electric power supplier or basic generation service provider
33 may satisfy the requirements of this subsection by participating in a
34 renewable energy trading program approved by the board in
35 consultation with the Department of Environmental Protection;

36 (3) that the board establish a multi-year schedule, applicable to
37 each electric power supplier or basic generation service provider in
38 this State, beginning with the one-year period commencing on June
39 1, 2010, and continuing for each subsequent one-year period up to
40 and including, the one-year period commencing on June 1, 2033,
41 that requires the following number or percentage, as the case may
42 be, of kilowatt-hours sold in this State by each electric power
43 supplier and each basic generation service provider to be from solar
44 electric power generators connected to the distribution system in
45 this State:

1	EY 2011	306 Gigawatthours (Gwhrs)
2	EY 2012	442 Gwhrs
3	EY 2013	596 Gwhrs
4	EY 2014	2.050%
5	EY 2015	2.450%
6	EY 2016	2.750%
7	EY 2017	3.000%
8	EY 2018	3.200%
9	EY 2019	4.300%
10	EY 2020	4.900%
11	EY 2021	5.100%
12	EY 2022	5.100%
13	EY 2023	5.100%
14	EY 2024	4.900%
15	EY 2025	4.800%
16	EY 2026	4.500%
17	EY 2027	4.350%
18	EY 2028	3.740%
19	EY 2029	3.070%
20	EY 2030	2.210%
21	EY 2031	1.580%
22	EY 2032	1.400%
23	EY 2033	1.100%

24

25 No later than 180 days after the date of enactment of P.L.2018,
26 c.17 (C.48:3-87.8 et al.), the board shall adopt rules and regulations
27 to close the SREC program to new applications upon the attainment
28 of 5.1 percent of the kilowatt-hours sold in the State by each
29 electric power supplier and each basic generation provider from
30 solar electric power generators connected to the distribution system.
31 The board shall continue to consider any application filed before the
32 date of enactment of P.L.2018, c.17 (C.48:3-87.8 et al.). The board
33 shall provide for an orderly and transparent mechanism that will
34 result in the closing of the existing SREC program on a date certain
35 but no later than June 1, 2021.

36 No later than 24 months after the date of enactment of P.L.2018,
37 c.17 (C.48:3-87.8 et al.), the board shall complete a study that
38 evaluates how to modify or replace the SREC program to encourage
39 the continued efficient and orderly development of solar renewable
40 energy generating sources throughout the State. The board shall
41 submit the written report thereon to the Governor and, pursuant to
42 section 2 of P.L.1991, c.164 (C.52:14-19.1), to the Legislature. The
43 board shall consult with public utilities, industry experts, regional
44 grid operators, solar power providers and financiers, and other State
45 agencies to determine whether the board can modify the SREC
46 program such that the program will:

1 - continually reduce, where feasible, the cost of achieving the
2 solar energy goals set forth in this subsection;

3 - provide an orderly transition from the SREC program to a new
4 or modified program;

5 - develop megawatt targets for grid connected and distribution
6 systems, including residential and small commercial rooftop
7 systems, community solar systems, and large scale behind the meter
8 systems, as a share of the overall solar energy requirement, which
9 targets the board may modify periodically based on the cost,
10 feasibility, or social impacts of different types of projects;

11 - establish and update market-based maximum incentive payment
12 caps periodically for each of the above categories of solar electric
13 power generation facilities;

14 - encourage and facilitate market-based cost recovery through
15 long-term contracts and energy market sales; and

16 - where cost recovery is needed for any portion of an efficient
17 solar electric power generation facility when costs are not
18 recoverable through wholesale market sales and direct payments
19 from customers, utilize competitive processes such as competitive
20 procurement and long-term contracts where possible to ensure such
21 recovery, without exceeding the maximum incentive payment cap
22 for that category of facility.

23 The board shall approve, conditionally approve, or disapprove
24 any application for designation as connected to the distribution
25 system of a solar electric power generation facility filed with the
26 board after the date of enactment of P.L.2018, c.17 (C.48:3-
27 87.8 et al.), no more than 90 days after receipt by the board of a
28 completed application. For any such application for a project
29 greater than 25 kilowatts, the board shall require the applicant to
30 post a notice escrow with the board in an amount of \$40 per
31 kilowatt of DC nameplate capacity of the facility, not to exceed
32 \$40,000. The notice escrow amount shall be reimbursed to the
33 applicant in full upon either denial of the application by the board
34 or upon commencement of commercial operation of the solar
35 electric power generation facility. The escrow amount shall be
36 forfeited to the State if the facility is designated as connected to the
37 distribution system pursuant to this subsection but does not
38 commence commercial operation within two years following the
39 date of the designation by the board.

40 For all applications for designation as connected to the
41 distribution system of a solar electric power generation facility filed
42 with the board after the date of enactment of P.L.2018, c.17
43 (C.48:3-87.8 et al.), the SREC term shall be 10 years.

44 (a) The board shall determine an appropriate period of no less
45 than 120 days following the end of an energy year prior to which a

1 provider or supplier must demonstrate compliance for that energy
2 year with the annual renewable portfolio standard;

3 (b) No more than 24 months following the date of enactment of
4 P.L.2012, c.24, the board shall complete a proceeding to investigate
5 approaches to mitigate solar development volatility and prepare and
6 submit, pursuant to section 2 of P.L.1991, c.164 (C.52:14-19.1), a
7 report to the Legislature, detailing its findings and
8 recommendations. As part of the proceeding, the board shall
9 evaluate other techniques used nationally and internationally;

10 (c) The solar renewable portfolio standards requirements in this
11 paragraph shall exempt those existing supply contracts which are
12 effective prior to the date of enactment of P.L.2018, c.17 (C.48:3-
13 87.8 et al.) from any increase beyond the number of SRECs
14 mandated by the solar renewable energy portfolio standards
15 requirements that were in effect on the date that the providers
16 executed their existing supply contracts. This limited exemption for
17 providers' existing supply contracts shall not be construed to lower
18 the Statewide solar sourcing requirements set forth in this
19 paragraph. Such incremental requirements that would have
20 otherwise been imposed on exempt providers shall be distributed
21 over the providers not subject to the existing supply contract
22 exemption until such time as existing supply contracts expire and
23 all providers are subject to the new requirement in a manner that is
24 competitively neutral among all providers and suppliers.
25 Notwithstanding any rule or regulation to the contrary, the board
26 shall recognize these new solar purchase obligations as a change
27 required by operation of law and implement the provisions of this
28 subsection in a manner so as to prevent any subsidies between
29 suppliers and providers and to promote competition in the
30 electricity supply industry.

31 An electric power supplier or basic generation service provider
32 may satisfy the requirements of this subsection by participating in a
33 renewable energy trading program approved by the board in
34 consultation with the Department of Environmental Protection, or
35 compliance with the requirements of this subsection may be
36 demonstrated to the board by suppliers or providers through the
37 purchase of SRECs.

38 The renewable energy portfolio standards adopted by the board
39 pursuant to paragraphs (1) and (2) of this subsection shall be
40 effective as regulations immediately upon filing with the Office of
41 Administrative Law and shall be effective for a period not to exceed
42 18 months, and may, thereafter, be amended, adopted or readopted
43 by the board in accordance with the provisions of the
44 "Administrative Procedure Act."

45 The renewable energy portfolio standards adopted by the board
46 pursuant to this paragraph shall be effective as regulations

1 immediately upon filing with the Office of Administrative Law and
2 shall be effective for a period not to exceed 30 months after such
3 filing, and shall, thereafter, be amended, adopted or readopted by
4 the board in accordance with the “Administrative Procedure Act”;
5 and

6 (4) within 180 days after the date of enactment of P.L.2010,
7 c.57 (C.48:3-87.1 et al.), that the board establish an offshore wind
8 renewable energy certificate program to require that a percentage of
9 the kilowatt hours sold in this State by each electric power supplier
10 and each basic generation service provider be from offshore wind
11 energy in order to support at least 3,500 megawatts of generation
12 from qualified offshore wind projects.

13 The percentage established by the board pursuant to this
14 paragraph shall serve as an offset to the renewable energy portfolio
15 standard established pursuant to paragraph (2) of this subsection
16 and shall reduce the corresponding Class I renewable energy
17 requirement.

18 The percentage established by the board pursuant to this
19 paragraph shall reflect the projected OREC production of each
20 qualified offshore wind project, approved by the board pursuant to
21 section 3 of P.L.2010, c.57 (C.48:3-87.1), for 20 years from the
22 commercial operation start date of the qualified offshore wind
23 project which production projection and OREC purchase
24 requirement, once approved by the board, shall not be subject to
25 reduction.

26 An electric power supplier or basic generation service provider
27 shall comply with the OREC program established pursuant to this
28 paragraph through the purchase of offshore wind renewable energy
29 certificates at a price and for the time period required by the board.
30 In the event there are insufficient offshore wind renewable energy
31 certificates available, the electric power supplier or basic generation
32 service provider shall pay an offshore wind alternative compliance
33 payment established by the board. Any offshore wind alternative
34 compliance payments collected shall be refunded directly to the
35 ratepayers by the electric public utilities.

36 The rules established by the board pursuant to this paragraph
37 shall be effective as regulations immediately upon filing with the
38 Office of Administrative Law and shall be effective for a period not
39 to exceed 18 months, and may, thereafter, be amended, adopted or
40 readopted by the board in accordance with the provisions of the
41 “Administrative Procedure Act,” P.L.1968, c.410 (C.52:14B-
42 1 et seq.).

43 e. Notwithstanding any provisions of the “Administrative
44 Procedure Act,” P.L.1968, c.410 (C.52:14B-1 et seq.) to the
45 contrary, the board shall initiate a proceeding and shall adopt, after

1 notice, provision of the opportunity for comment, and public
2 hearing:

3 (1) net metering standards for electric power suppliers and basic
4 generation service providers. The standards shall require electric
5 power suppliers and basic generation service providers to offer net
6 metering at non-discriminatory rates to industrial, large
7 commercial, residential and small commercial customers, as those
8 customers are classified or defined by the board, that generate
9 electricity, on the customer's side of the meter, using a Class I
10 renewable energy source, for the net amount of electricity supplied
11 by the electric power supplier or basic generation service provider
12 over an annualized period. Systems of any sized capacity, as
13 measured in watts, are eligible for net metering. If the amount of
14 electricity generated by the customer-generator, plus any kilowatt
15 hour credits held over from the previous billing periods, exceeds the
16 electricity supplied by the electric power supplier or basic
17 generation service provider, then the electric power supplier or
18 basic generation service provider, as the case may be, shall credit
19 the customer-generator for the excess kilowatt hours until the end of
20 the annualized period at which point the customer-generator will be
21 compensated for any remaining credits or, if the customer-generator
22 chooses, credit the customer-generator on a real-time basis, at the
23 electric power supplier's or basic generation service provider's
24 avoided cost of wholesale power or the PJM electric power pool's
25 real-time locational marginal pricing rate, adjusted for losses, for
26 the respective zone in the PJM electric power pool. Alternatively,
27 the customer-generator may execute a bilateral agreement with an
28 electric power supplier or basic generation service provider for the
29 sale and purchase of the customer-generator's excess generation.
30 The customer-generator may be credited on a real-time basis, so
31 long as the customer-generator follows applicable rules prescribed
32 by the PJM electric power pool for its capacity requirements for the
33 net amount of electricity supplied by the electric power supplier or
34 basic generation service provider. The board may authorize an
35 electric power supplier or basic generation service provider to cease
36 offering net metering to customers that are not already net metered
37 whenever the total rated generating capacity owned and operated by
38 net metering customer-generators Statewide equals 5.8 percent of
39 the total annual kilowatt-hours sold in this State by each electric
40 power supplier and each basic generation service provider during
41 the prior one-year period;

42 (2) safety and power quality interconnection standards for Class
43 I renewable energy source systems used by a customer-generator
44 that shall be eligible for net metering.

45 Such standards or rules shall take into consideration the goals of
46 the New Jersey Energy Master Plan, applicable industry standards,

1 and the standards of other states and the Institute of Electrical and
2 Electronics Engineers. The board shall allow electric public
3 utilities to recover the costs of any new net meters, upgraded net
4 meters, system reinforcements or upgrades, and interconnection
5 costs through either their regulated rates or from the net metering
6 customer-generator;

7 (3) credit or other incentive rules for generators using Class I
8 renewable energy generation systems that connect to New Jersey's
9 electric public utilities' distribution system but who do not net
10 meter; and

11 (4) net metering aggregation standards to require electric public
12 utilities to provide net metering aggregation to single electric public
13 utility customers that operate a solar electric power generation
14 system installed at one of the customer's facilities or on property
15 owned by the customer, provided that any such customer is a State
16 entity, school district, county, county agency, county authority,
17 municipality, municipal agency, or municipal authority. The
18 standards shall provide that, in order to qualify for net metering
19 aggregation, the customer must operate a solar electric power
20 generation system using a net metering billing account, which
21 system is located on property owned by the customer, provided that:
22 (a) the property is not land that has been actively devoted to
23 agricultural or horticultural use and that is valued, assessed, and
24 taxed pursuant to the "Farmland Assessment Act of 1964,"
25 P.L.1964, c.48 (C.54:4-23.1 et seq.) at any time within the 10-year
26 period prior to the effective date of P.L.2012, c.24, provided,
27 however, that the municipal planning board of a municipality in
28 which a solar electric power generation system is located may
29 waive the requirement of this subparagraph (a), (b) the system is not
30 an on-site generation facility, (c) all of the facilities of the single
31 customer combined for the purpose of net metering aggregation are
32 facilities owned or operated by the single customer and are located
33 within its territorial jurisdiction except that all of the facilities of a
34 State entity engaged in net metering aggregation shall be located
35 within five miles of one another, and (d) all of those facilities are
36 within the service territory of a single electric public utility and are
37 all served by the same basic generation service provider or by the
38 same electric power supplier. The standards shall provide that in
39 order to qualify for net metering aggregation, the customer's solar
40 electric power generation system shall be sized so that its annual
41 generation does not exceed the combined metered annual energy
42 usage of the qualified customer facilities, and the qualified
43 customer facilities shall all be in the same customer rate class under
44 the applicable electric public utility tariff. For the customer's
45 facility or property on which the solar electric generation system is
46 installed, the electricity generated from the customer's solar electric

1 generation system shall be accounted for pursuant to the provisions
2 of paragraph (1) of this subsection to provide that the electricity
3 generated in excess of the electricity supplied by the electric power
4 supplier or the basic generation service provider, as the case may
5 be, for the customer's facility on which the solar electric generation
6 system is installed, over the annualized period, is credited at the
7 electric power supplier's or the basic generation service provider's
8 avoided cost of wholesale power or the PJM electric power pool
9 real-time locational marginal pricing rate. All electricity used by
10 the customer's qualified facilities, with the exception of the facility
11 or property on which the solar electric power generation system is
12 installed, shall be billed at the full retail rate pursuant to the electric
13 public utility tariff applicable to the customer class of the customer
14 using the electricity. A customer may contract with a third party to
15 operate a solar electric power generation system, for the purpose of
16 net metering aggregation. Any contractual relationship entered into
17 for operation of a solar electric power generation system related to
18 net metering aggregation shall include contractual protections that
19 provide for adequate performance and provision for construction
20 and operation for the term of the contract, including any appropriate
21 bonding or escrow requirements. Any incremental cost to an
22 electric public utility for net metering aggregation shall be fully and
23 timely recovered in a manner to be determined by the board. The
24 board shall adopt net metering aggregation standards within 270
25 days after the effective date of P.L.2012, c.24.

26 Such rules shall require the board or its designee to issue a credit
27 or other incentive to those generators that do not use a net meter but
28 otherwise generate electricity derived from a Class I renewable
29 energy source and to issue an enhanced credit or other incentive,
30 including, but not limited to, a solar renewable energy credit, to
31 those generators that generate electricity derived from solar
32 technologies.

33 Such standards or rules shall be effective as regulations
34 immediately upon filing with the Office of Administrative Law and
35 shall be effective for a period not to exceed 18 months, and may,
36 thereafter, be amended, adopted or readopted by the board in
37 accordance with the provisions of the "Administrative Procedure
38 Act."

39 f. The board may assess, by written order and after notice and
40 opportunity for comment, a separate fee to cover the cost of
41 implementing and overseeing an emission disclosure system or
42 emission portfolio standard, which fee shall be assessed based on an
43 electric power supplier's or basic generation service provider's share
44 of the retail electricity supply market. The board shall not impose a
45 fee for the cost of implementing and overseeing a greenhouse gas

1 emissions portfolio standard adopted pursuant to paragraph (2) of
2 subsection c. of this section.

3 g. The board shall adopt, pursuant to the “Administrative
4 Procedure Act,” P.L.1968, c.410 (C.52:14B-1 et seq.), an electric
5 energy efficiency program in order to ensure investment in cost-
6 effective energy efficiency measures, ensure universal access to
7 energy efficiency measures, and serve the needs of low-income
8 communities that shall require each electric public utility to
9 implement energy efficiency measures that reduce electricity usage
10 in the State pursuant to section 3 of P.L.2018, c.17 (C.48:3-87.9).
11 Nothing in this subsection shall be construed to prevent an electric
12 public utility from meeting the requirements of this subsection by
13 contracting with another entity for the performance of the
14 requirements.

15 h. The board shall adopt, pursuant to the “Administrative
16 Procedure Act,” P.L.1968, c.410 (C.52:14B-1 et seq.), a gas energy
17 efficiency program in order to ensure investment in cost-effective
18 energy efficiency measures, ensure universal access to energy
19 efficiency measures, and serve the needs of low-income
20 communities that shall require each gas public utility to implement
21 energy efficiency measures that reduce natural gas usage in the
22 State pursuant to section 3 of P.L.2018, c.17 (C.48:3-87.9).
23 Nothing in this subsection shall be construed to prevent a gas public
24 utility from meeting the requirements of this subsection by
25 contracting with another entity for the performance of the
26 requirements.

27 i. After the board establishes a schedule of solar kilowatt-hour
28 sale or purchase requirements pursuant to paragraph (3) of
29 subsection d. of this section, the board may initiate subsequent
30 proceedings and adopt, after appropriate notice and opportunity for
31 public comment and public hearing, increased minimum solar
32 kilowatt-hour sale or purchase requirements, provided that the
33 board shall not reduce previously established minimum solar
34 kilowatt-hour sale or purchase requirements, or otherwise impose
35 constraints that reduce the requirements by any means.

36 j. The board shall determine an appropriate level of solar
37 alternative compliance payment, and permit each supplier or
38 provider to submit an SACP to comply with the solar electric
39 generation requirements of paragraph (3) of subsection d. of this
40 section. The value of the SACP for each Energy Year, for Energy
41 Years 2014 through 2033 per megawatt hour from solar electric
42 generation required pursuant to this section, shall be:

43
44 EY 2014 \$339
45 EY 2015 \$331
46 EY 2016 \$323

1	EY 2017	\$315
2	EY 2018	\$308
3	EY 2019	\$268
4	EY 2020	\$258
5	EY 2021	\$248
6	EY 2022	\$238
7	EY 2023	\$228
8	EY 2024	\$218
9	EY 2025	\$208
10	EY 2026	\$198
11	EY 2027	\$188
12	EY 2028	\$178
13	EY 2029	\$168
14	EY 2030	\$158
15	EY 2031	\$148
16	EY 2032	\$138
17	EY 2033	\$128.

18

19 The board may initiate subsequent proceedings and adopt, after
20 appropriate notice and opportunity for public comment and public
21 hearing, an increase in solar alternative compliance payments,
22 provided that the board shall not reduce previously established
23 levels of solar alternative compliance payments, nor shall the board
24 provide relief from the obligation of payment of the SACP by the
25 electric power suppliers or basic generation service providers in any
26 form. Any SACP payments collected shall be refunded directly to
27 the ratepayers by the electric public utilities.

28 k. The board may allow electric public utilities to offer long-
29 term contracts through a competitive process, direct electric public
30 utility investment and other means of financing, including but not
31 limited to loans, for the purchase of SRECs and the resale of SRECs
32 to suppliers or providers or others, provided that after such
33 contracts have been approved by the board, the board's approvals
34 shall not be modified by subsequent board orders. If the board
35 allows the offering of contracts pursuant to this subsection, the
36 board may establish a process, after hearing, and opportunity for
37 public comment, to provide that a designated segment of the
38 contracts approved pursuant to this subsection shall be contracts
39 involving solar electric power generation facility projects with a
40 capacity of up to 250 kilowatts.

41 l. The board shall implement its responsibilities under the
42 provisions of this section in such a manner as to:

43 (1) place greater reliance on competitive markets, with the
44 explicit goal of encouraging and ensuring the emergence of new
45 entrants that can foster innovations and price competition;

- 1 (2) maintain adequate regulatory authority over non-competitive
- 2 public utility services;
- 3 (3) consider alternative forms of regulation in order to address
- 4 changes in the technology and structure of electric public utilities;
- 5 (4) promote energy efficiency and Class I renewable energy
- 6 market development, taking into consideration environmental
- 7 benefits and market barriers;
- 8 (5) make energy services more affordable for low and moderate
- 9 income customers;
- 10 (6) attempt to transform the renewable energy market into one
- 11 that can move forward without subsidies from the State or public
- 12 utilities;
- 13 (7) achieve the goals put forth under the renewable energy
- 14 portfolio standards;
- 15 (8) promote the lowest cost to ratepayers; and
- 16 (9) allow all market segments to participate.
- 17 m. The board shall ensure the availability of financial incentives
- 18 under its jurisdiction, including, but not limited to, long-term
- 19 contracts, loans, SRECs, or other financial support, to ensure
- 20 market diversity, competition, and appropriate coverage across all
- 21 ratepayer segments, including, but not limited to, residential,
- 22 commercial, industrial, non-profit, farms, schools, and public entity
- 23 customers.
- 24 n. For projects which are owned, or directly invested in, by a
- 25 public utility pursuant to section 13 of P.L.2007, c.340 (C.48:3-
- 26 98.1), the board shall determine the number of SRECs with which
- 27 such projects shall be credited; and in determining such number the
- 28 board shall ensure that the market for SRECs does not detrimentally
- 29 affect the development of non-utility solar projects and shall
- 30 consider how its determination may impact the ratepayers.
- 31 o. The board, in consultation with the Department of
- 32 Environmental Protection, electric public utilities, the Division of
- 33 Rate Counsel in, but not of, the Department of the Treasury,
- 34 affected members of the solar energy industry, and relevant
- 35 stakeholders, shall periodically consider increasing the renewable
- 36 energy portfolio standards beyond the minimum amounts set forth
- 37 in subsection d. of this section, taking into account the cost impacts
- 38 and public benefits of such increases including, but not limited to:
- 39 (1) reductions in air pollution, water pollution, land disturbance,
- 40 and greenhouse gas emissions;
- 41 (2) reductions in peak demand for electricity and natural gas,
- 42 and the overall impact on the costs to customers of electricity and
- 43 natural gas;
- 44 (3) increases in renewable energy development, manufacturing,
- 45 investment, and job creation opportunities in this State; and

1 (4) reductions in State and national dependence on the use of
2 fossil fuels.

3 p. Class I RECs and ORECs shall be eligible for use in
4 renewable energy portfolio standards compliance in the energy year
5 in which they are generated, and for the following two energy years.
6 SRECs shall be eligible for use in renewable energy portfolio
7 standards compliance in the energy year in which they are
8 generated, and for the following four energy years.

9 q. (1) During the energy years of 2014, 2015, and 2016, a solar
10 electric power generation facility project that is not: (a) net
11 metered; (b) an on-site generation facility; (c) qualified for net
12 metering aggregation; or (d) certified as being located on a
13 brownfield, on an area of historic fill or on a properly closed
14 sanitary landfill facility, as provided pursuant to subsection t. of this
15 section may file an application with the board for approval of a
16 designation pursuant to this subsection that the facility is connected
17 to the distribution system. An application filed pursuant to this
18 subsection shall include a notice escrow of \$40,000 per megawatt of
19 the proposed capacity of the facility. The board shall approve the
20 designation if: the facility has filed a notice in writing with the
21 board applying for designation pursuant to this subsection, together
22 with the notice escrow; and the capacity of the facility, when added
23 to the capacity of other facilities that have been previously
24 approved for designation prior to the facility's filing under this
25 subsection, does not exceed 80 megawatts in the aggregate for each
26 year. The capacity of any one solar electric power supply project
27 approved pursuant to this subsection shall not exceed 10 megawatts.
28 No more than 90 days after its receipt of a completed application
29 for designation pursuant to this subsection, the board shall approve,
30 conditionally approve, or disapprove the application. The notice
31 escrow shall be reimbursed to the facility in full upon either
32 rejection by the board or the facility entering commercial operation,
33 or shall be forfeited to the State if the facility is designated pursuant
34 to this subsection but does not enter commercial operation pursuant
35 to paragraph (2) of this subsection.

36 (2) If the proposed solar electric power generation facility does
37 not commence commercial operations within two years following
38 the date of the designation by the board pursuant to this subsection,
39 the designation of the facility shall be deemed to be null and void,
40 and the facility shall not be considered connected to the distribution
41 system thereafter.

42 (3) Notwithstanding the provisions of paragraph (2) of this
43 subsection, a solar electric power generation facility project that as
44 of May 31, 2017 was designated as "connected to the distribution
45 system," but failed to commence commercial operations as of that

1 date, shall maintain that designation if it commences commercial
2 operations by May 31, 2018.

3 r. (1) For all proposed solar electric power generation facility
4 projects except for those solar electric power generation facility
5 projects approved pursuant to subsection q. of this section, and for
6 all projects proposed in energy year 2019 and energy year 2020, the
7 board may approve projects for up to 50 megawatts annually in
8 auctioned capacity in two auctions per year as long as the board is
9 accepting applications. If the board approves projects for less than
10 50 megawatts in energy year 2019 or less than 50 megawatts in
11 energy year 2020, the difference in each year shall be carried over
12 into the successive energy year until 100 megawatts of auctioned
13 capacity has been approved by the board pursuant to this
14 subsection. A proposed solar electric power generation facility that
15 is neither net metered nor an on-site generation facility, may be
16 considered “connected to the distribution system” only upon
17 designation as such by the board, after notice to the public and
18 opportunity for public comment or hearing. A proposed solar
19 power electric generation facility seeking board designation as
20 “connected to the distribution system” shall submit an application
21 to the board that includes for the proposed facility: the nameplate
22 capacity; the estimated energy and number of SRECs to be
23 produced and sold per year; the estimated annual rate impact on
24 ratepayers; the estimated capacity of the generator as defined by
25 PJM for sale in the PJM capacity market; the point of
26 interconnection; the total project acreage and location; the current
27 land use designation of the property; the type of solar technology to
28 be used; and such other information as the board shall require.

29 (2) The board shall approve the designation of the proposed
30 solar power electric generation facility as “connected to the
31 distribution system” if the board determines that:

32 (a) the SRECs forecasted to be produced by the facility do not
33 have a detrimental impact on the SREC market or on the
34 appropriate development of solar power in the State;

35 (b) the approval of the designation of the proposed facility
36 would not significantly impact the preservation of open space in
37 this State;

38 (c) the impact of the designation on electric rates and economic
39 development is beneficial; and

40 (d) there will be no impingement on the ability of an electric
41 public utility to maintain its property and equipment in such a
42 condition as to enable it to provide safe, adequate, and proper
43 service to each of its customers.

44 (3) The board shall act within 90 days of its receipt of a
45 completed application for designation of a solar power electric
46 generation facility as “connected to the distribution system,” to

1 either approve, conditionally approve, or disapprove the
2 application. If the proposed solar electric power generation facility
3 does not commence commercial operations within two years
4 following the date of the designation by the board pursuant to this
5 subsection, the designation of the facility as “connected to the
6 distribution system” shall be deemed to be null and void, and the
7 facility shall thereafter be considered not “connected to the
8 distribution system.”

9 s. In addition to any other requirements of P.L.1999, c.23 or
10 any other law, rule, regulation or order, a solar electric power
11 generation facility that is not net metered or an on-site generation
12 facility and which is located on land that has been actively devoted
13 to agricultural or horticultural use that is valued, assessed, and
14 taxed pursuant to the “Farmland Assessment Act of 1964,”
15 P.L.1964, c.48 (C.54:4-23.1 et seq.) at any time within the 10-year
16 period prior to the effective date of P.L.2012, c.24, shall only be
17 considered “connected to the distribution system” if (1) the board
18 approves the facility's designation pursuant to subsection q. of this
19 section; or (2) (a) PJM issued a System Impact Study for the facility
20 on or before June 30, 2011, (b) the facility files a notice with the
21 board within 60 days of the effective date of P.L.2012, c.24,
22 indicating its intent to qualify under this subsection, and (c) the
23 facility has been approved as “connected to the distribution system”
24 by the board. Nothing in this subsection shall limit the board's
25 authority concerning the review and oversight of facilities, unless
26 such facilities are exempt from such review as a result of having
27 been approved pursuant to subsection q. of this section.

28 t. (1) No more than 180 days after the date of enactment of
29 P.L.2012, c.24, the board shall, in consultation with the Department
30 of Environmental Protection and the New Jersey Economic
31 Development Authority, and, after notice and opportunity for public
32 comment and public hearing, complete a proceeding to establish a
33 program to provide SRECs to owners of solar electric power
34 generation facility projects certified by the board, in consultation
35 with the Department of Environmental Protection, as being located
36 on a brownfield, on an area of historic fill or on a properly closed
37 sanitary landfill facility, including those owned or operated by an
38 electric public utility and approved pursuant to section 13 of
39 P.L.2007, c.340 (C.48:3-98.1). Projects certified under this
40 subsection shall be considered “connected to the distribution
41 system”, shall not require such designation by the board, and shall
42 not be subject to board review required pursuant to subsections q.
43 and r. of this section. Notwithstanding the provisions of section 3
44 of P.L.1999, c.23 (C.48:3-51) or any other law, rule, regulation, or
45 order to the contrary, for projects certified under this subsection, the
46 board shall establish a financial incentive that is designed to

1 supplement the SRECs generated by the facility in order to cover
2 the additional cost of constructing and operating a solar electric
3 power generation facility on a brownfield, on an area of historic fill
4 or on a properly closed sanitary landfill facility. Any financial
5 benefit realized in relation to a project owned or operated by an
6 electric public utility and approved by the board pursuant to section
7 13 of P.L.2007, c.340 (C.48:3-98.1), as a result of the provision of a
8 financial incentive established by the board pursuant to this
9 subsection, shall be credited to ratepayers. The issuance of SRECs
10 for all solar electric power generation facility projects pursuant to
11 this subsection shall be deemed "Board of Public Utilities financial
12 assistance" as provided under section 1 of P.L.2009, c.89 (C.48:2-
13 29.47).

14 (2) Notwithstanding the provisions of the "Spill Compensation
15 and Control Act," P.L.1976, c.141 (C.58:10-23.11 et seq.) or any
16 other law, rule, regulation, or order to the contrary, the board, in
17 consultation with the Department of Environmental Protection, may
18 find that a person who operates a solar electric power generation
19 facility project that has commenced operation on or after the
20 effective date of P.L.2012, c.24, which project is certified by the
21 board, in consultation with the Department of Environmental
22 Protection pursuant to paragraph (1) of this subsection, as being
23 located on a brownfield for which a final remediation document has
24 been issued, on an area of historic fill or on a properly closed
25 sanitary landfill facility, which projects shall include, but not be
26 limited to projects located on a brownfield for which a final
27 remediation document has been issued, on an area of historic fill or
28 on a properly closed sanitary landfill facility owned or operated by
29 an electric public utility and approved pursuant to section 13 of
30 P.L.2007, c.340 (C.48:3-98.1), or a person who owns property
31 acquired on or after the effective date of P.L.2012, c.24 on which
32 such a solar electric power generation facility project is constructed
33 and operated, shall not be liable for cleanup and removal costs to
34 the Department of Environmental Protection or to any other person
35 for the discharge of a hazardous substance provided that:

36 (a) the person acquired or leased the real property after the
37 discharge of that hazardous substance at the real property;

38 (b) the person did not discharge the hazardous substance, is not
39 in any way responsible for the hazardous substance, and is not a
40 successor to the discharger or to any person in any way responsible
41 for the hazardous substance or to anyone liable for cleanup and
42 removal costs pursuant to section 8 of P.L.1976, c.141 (C.58:10-
43 23.11g);

44 (c) the person, within 30 days after acquisition of the property,
45 gave notice of the discharge to the Department of Environmental

- 1 Protection in a manner the Department of Environmental Protection
2 prescribes;
- 3 (d) the person does not disrupt or change, without prior written
4 permission from the Department of Environmental Protection, any
5 engineering or institutional control that is part of a remedial action
6 for the contaminated site or any landfill closure or post-closure
7 requirement;
- 8 (e) the person does not exacerbate the contamination at the
9 property;
- 10 (f) the person does not interfere with any necessary remediation
11 of the property;
- 12 (g) the person complies with any regulations and any permit the
13 Department of Environmental Protection issues pursuant to section
14 19 of P.L.2009, c.60 (C.58:10C-19) or paragraph (2) of subsection
15 a. of section 6 of P.L.1970, c.39 (C.13:1E-6);
- 16 (h) with respect to an area of historic fill, the person has
17 demonstrated pursuant to a preliminary assessment and site
18 investigation, that hazardous substances have not been discharged;
19 and
- 20 (i) with respect to a properly closed sanitary landfill facility, no
21 person who owns or controls the facility receives, has received, or
22 will receive, with respect to such facility, any funds from any post-
23 closure escrow account established pursuant to section 10 of
24 P.L.1981, c.306 (C.13:1E-109) for the closure and monitoring of
25 the facility.
- 26 Only the person who is liable to clean up and remove the
27 contamination pursuant to section 8 of P.L.1976, c.141 (C.58:10-
28 23.11g) and who does not have a defense to liability pursuant to
29 subsection d. of that section shall be liable for cleanup and removal
30 costs.
- 31 u. No more than 180 days after the date of enactment of
32 P.L.2012, c.24, the board shall complete a proceeding to establish a
33 registration program. The registration program shall require the
34 owners of solar electric power generation facility projects
35 connected to the distribution system to make periodic milestone
36 filings with the board in a manner and at such times as determined
37 by the board to provide full disclosure and transparency regarding
38 the overall level of development and construction activity of those
39 projects Statewide.
- 40 v. The issuance of SRECs for all solar electric power
41 generation facility projects pursuant to this section, for projects
42 connected to the distribution system with a capacity of one
43 megawatt or greater, shall be deemed "Board of Public Utilities
44 financial assistance" as provided pursuant to section 1 of P.L.2009,
45 c.89 (C.48:2-29.47).

1 w. No more than 270 days after the date of enactment of
2 P.L.2012, c.24, the board shall, after notice and opportunity for
3 public comment and public hearing, complete a proceeding to
4 consider whether to establish a program to provide, to owners of
5 solar electric power generation facility projects certified by the
6 board as being three megawatts or greater in capacity and being net
7 metered, including facilities which are owned or operated by an
8 electric public utility and approved by the board pursuant to section
9 13 of P.L.2007, c.340 (C.48:3-98.1), a financial incentive that is
10 designed to supplement the SRECs generated by the facility to
11 further the goal of improving the economic competitiveness of
12 commercial and industrial customers taking power from such
13 projects. If the board determines to establish such a program
14 pursuant to this subsection, the board may establish a financial
15 incentive to provide that the board shall issue one SREC for no less
16 than every 750 kilowatt-hours of solar energy generated by the
17 certified projects. Any financial benefit realized in relation to a
18 project owned or operated by an electric public utility and approved
19 by the board pursuant to section 13 of P.L.2007, c.340 (C.48:3-
20 98.1), as a result of the provisions of a financial incentive
21 established by the board pursuant to this subsection, shall be
22 credited to ratepayers.

23 x. Solar electric power generation facility projects that are
24 located on an existing or proposed commercial, retail, industrial,
25 municipal, professional, recreational, transit, commuter,
26 entertainment complex, multi-use, or mixed-use parking lot with a
27 capacity to park 350 or more vehicles where the area to be utilized
28 for the facility is paved, or an impervious surface may be owned or
29 operated by an electric public utility and may be approved by the
30 board pursuant to section 13 of P.L.2007, c.340 (C.48:3-98.1).

31 y. (1) Notwithstanding any provision of this section, or any
32 rule or regulation adopted pursuant thereto, no later than one year
33 after the effective date of P.L. , c. (C.) (pending before the
34 Legislature as this bill), the board, in consultation with the
35 Department of Environmental Protection, shall adopt, pursuant to
36 the "Administrative Procedure Act," P.L.1968, c.410 (C.52:14B-
37 1 et seq.) a carbon emissions portfolio standard that requires all
38 power sold to customers in the State by electric power suppliers and
39 basic generation service providers be derived from energy sources
40 that emit zero carbon by energy year 2050.

41 (2) The carbon emissions portfolio standard pursuant to
42 paragraph (1) of this subsection shall:

43 (a) establish a multi-year schedule, applicable to each electric
44 power supplier and basic generation service provider that provides
45 power to customers in this State, setting forth gradual emissions

1 reduction requirements to effectively transition to zero carbon
2 emissions by energy year 2050;

3 (b) include provisions as may be necessary to mitigate leakage,
4 or to transfer any customer to a basic generation service provider or
5 electric power supplier that meets the carbon emissions portfolio
6 standard;

7 (c) exempt the provision of basic generation service pursuant to
8 a basic generation service purchase and sale agreement effective
9 prior to the date of the adoption of the rules and regulations; and

10 (d) include any additional rules or regulations consistent with
11 the board's and the Department of Environmental Protection's
12 existing authority that may be necessary for the implementation of
13 this subsection.

14 (cf: P.L.2018, c.17, s.2)

15
16 2. This act shall take effect immediately.

17
18
19 STATEMENT

20
21 This bill would require the Board of Public Utilities (BPU) to
22 adopt an emissions portfolio standard that would eliminate carbon
23 emissions from the power generation sector by 2050.

24 The BPU, in consultation with the Department of Environmental
25 Protection (DEP), would be required to adopt the carbon emissions
26 portfolio standard no later than one year after the effective date of
27 the bill. The carbon emissions portfolio standard would include: (1)
28 a multi-year schedule, with gradual emissions reduction
29 requirements to require that all power sold to customers in the State
30 by electric power suppliers and basic generation service providers
31 be derived from sources that have zero carbon emissions; (2)
32 provisions to mitigate leakage or to transfer any customer to a basic
33 generation service provider or electric power supplier that meets the
34 carbon emissions portfolio standard; (3) an exemption for basic
35 generation service pursuant to a purchase and sale agreement
36 effective prior to the date of the adoption of the rules and
37 regulations; (4) any additional rules or regulations consistent with
38 the board's and the DEP's existing authority that may be necessary
39 for the implementation of the bill.
